DETAILED ACTION

1. The petition to withdrawn from issued has been granted on Feb. 28, 2005.

This application is a RCE of SN 09/843,126.

Amendment filed dated Sept. 22, 2004 have been entered. Claims 13, 14, 56-57, 59-60, 62-63 have been canceled. Claims 64-72 stayed withdrawn from consideration. Claims 1-12, 15-55, 58, 61, 73-76 are pending.

An IDS has been filed and considered.

2. *Reason for Allowance*

The following is an examiner's statement of reasons for allowance:

Applicants presented that because of the description in US 5,442,064 at col. 1, lines 63-68, the compounds of '064 patent will not support a carbonyl bonding to a heterocyclic ring at a carbon atom. A survey of the structural delineation from cas (see CA structure for US 5442064 attached) evidenced that such interpretation is correct. Therefore, the 103(a) rejection is dropped. Applicants have authorized cancellation of all the non-elected claims. Thus, claims 1-12, 15-55, 58, 61, 73-76 are allowed.

The recited references on the IDS are the patent family of US 6,812,236. the subject matter of the '236 patent differ from the instant claims in that when the R3 substituents on the 1-position of the piperidiny ring is carbonyl containing, i.e. the $-W-A^1-N(R^{12b})(R^{12c})$ and W is CO, there must be an amino i.e. the $-N(R^{12b})(R^{12c})$ at its terminal while the instant claims are drawn to compounds wherein the corresponding R3 does not contain such terminal $N(R^{12b})(R^{12c})$ group. In addition, all the examples and preparation of the '236 patent have a 2,3-dimethyl substituted piperidine which is considered a teaching away from the instant claims wherein only one R4 is allowed on the piperidiny ring. In re Baird 29 USPQ2d 1550.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
